

Mission:

The Nevada Association of Conservation Districts represent Nevada's Conservation Districts on a state and national level to help them achieve their goals of conserving and improving natural resources.

Role:

Conservation Districts in Nevada make up the state's only grassroots forum for addressing local conservation issues. They are a primary point for coordination of local, state, and federal efforts to protect natural resources.

Work:

The Districts work with community members, land owners, agencies, and organizations to encourage Best Management Practices in conservation. Districts serve Nevadans by providing technical, financial, and educational assistance to help our environment.

Conservation Partners

Nevada Conservation Districts work with a variety of agencies helping to conserve our natural resources. Our main partners include:

- Nevada Association of Conservation Districts
- Nevada State Conservation Commission
- National Association of Conservation Districts
- Natural Resources Conservation Service
- United States Department of Agriculture

This brochure was produced by the Washoe-Storey Conservation District in cooperation with the Nevada Association of Conservation Districts and USDA Natural Resources Conservation Service.
